Notes:

1- The application with the highest points is NeoLemmings CE 1.1.2, mostly because it has the most skills.

It is my personal opinion that development should stop on NeoLemmings, because :

- \*It is almost perfect for such a retro game like Lemmings
- \* should give more time and resources to enhance the other applications
- \*NeoLemmings started to lose its originality in comparison with DOS Lemmings of the year 1991

2-The highest emphasis could be put in Lix:

- \*menus should be restructured ... many menus should be deleted, combined and/or simplified
- \*lix has the biggest potential over the other applications
- \*the low points of Lix has to do of being not Lemmings oriented
- \*the built in editor is its best attribute
- \*it has the best infrastructure and can be easily enhanced to incorporate online sharing of playing experience

3-No need for further development to SuperLemmings or RetroLemmings unless major changes would be included such as :

- \*\*adding extra skills
- \*\*Built in Editor
- \*\*online sharing of playing experience
